

SAFETY ENGINEERING

a coesia company

REMOVING THE THREATS

The margin for production errors is constantly shrinking. Manufacturers need control over a long list of threats like; contamination, interference, injury, delays and defects.

With FlexLink's enclosures, guardings, consultancy and safety systems, you can be proactive about protecting your assets. What's more, you can further streamline production and add new dimensions of flexibility, robustness and sustainability at the same time!

Using the FlexLink Design Tool it is quick and easy to design enclosures and safety guardings. Built-in intelligence helps to avoid design errors and save time. Ordering is fast and straightforward thanks to the export feature of the bill of material, including all necessary machining. Intuitive assembly drawings can be prepared for a fast and trouble free installation.

GUARDINGS

Our safety guards protect areas that could cause injury to operators. We offer fence solutions that are modular, with a highly flexible design. While quick and easy to assemble, they also facilitate compliance with many types of legal requirements. Depending on your need, we can integrate 3rd party equipment such as; sensors, switches, special locks, and impact/collision protection.

ENCLOSURES

Contamination and disturbances can be eliminated by encapsulating your process machines. We have a complete range of components for designing the enclosure that meets your particular needs. For example, our closed beams make a clean and professional impression, while serving their intended purpose of eliminating places where dirt and dust can hide. They are also designed to facilitate compact layouts and quick installation.

CONSULTANCY & SAFETY SYSTEMS

When designing safety systems, FlexLink uses a full life-cycle approach. Our team of experts works with you through all stages of the process, assisting you in making the risk assessment, stating the functional requirements, designing the application and finally; installation and maintenance. Our goal is to deliver a safe solution that can also be adapted to changed circumstances and new regulations.

COESIA GROUP IN THE WORLD

coesia

Coesia is a group of innovation-based industrial solutions companies operating globally, headquartered in Bologna, Italy.

Coesia's companies are leaders in the sectors of:

- Advanced automated machinery and materials
- Industrial process solutions
- Precision gears

Coesia's customers are leading players in a broad range of industries, including Consumer Goods, Tobacco, Healthcare, Aerospace, Racing & Automotive and Electronics.
