

Type H slide rail – now available for conveyor system XK

Slide rail X_CR 25 H was recently released for the XL, XM and XH conveyor systems, and is now also available for system XK.

The type H slide rail is designed for the same type of applications as type U, but has improved technical features:

- Virtually maintenance free
- Low friction
- No elongation
- High wear resistance
- Good chemical resistance
- Good temperature resistance
- Approved according to EC-regulations to be used as “material for food contact applications”

X_CR 25 H is also suitable for use with the wash-down conveyor system, Series C, and the stainless steel conveyor system, Series X.

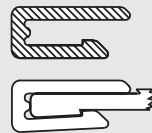

Mounting

X_CR 25 H is, from a mounting point of view, similar to X_CR 25 P, i.e. somewhat stiffer than X_CR 25 U.

Characteristics

Material	_____	PH/PE (Polyamide/ Polyethylene)
Coefficient of friction	_____	0,1–0,25
Temperature range	_____	–40 °C to 100 °C
Colour	_____	Grey
