

XT conductive option AS2

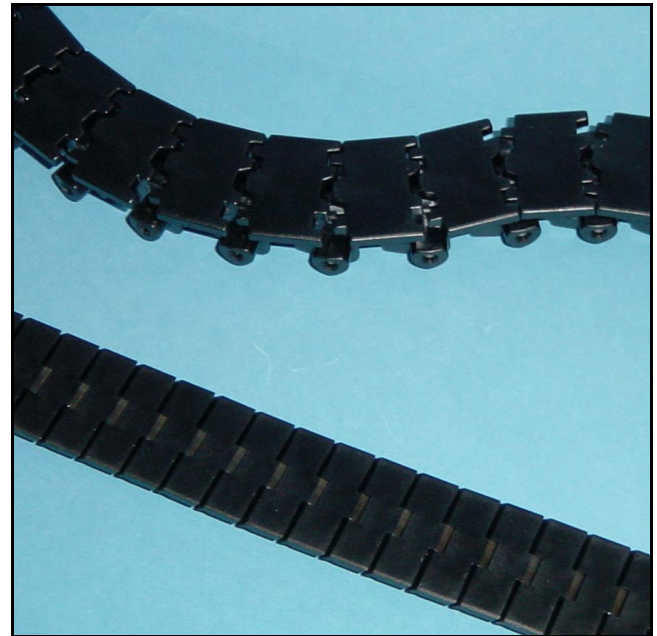

A new antistatic option, AS2, is now available for all XT conveyor, transfer and workstation modules. Instead of the dissipative chain and conductive slide rail in the AS1 option, AS2 includes a conductive chain and conductive slide rail. This option is very useful in processes that are sensitive to static electricity.

Technical data for XT module, AS2

Electrostatic potentials (at $12 \pm 3\%$ RH) ... <100 V
Resistance to ground $10^8 \Omega$
Max. permissible chain tension,
XT conveyor 1500 N
Max. permissible chain tension,
XT Light conveyor 360 N

Materials

XTPP 5 EC (XT) Acetal resin + carbon
5051585 (XT Light) Acetal resin + carbon

Spare parts information

Conveyor size	Spare part item no.
XT	XTPP 5 EC
XT Light	5051585
