

New slide rail material

A new slide rail, XLCR 25 H, is now available for XL, XM and XH conveyor beams. XLCR 25 H is designed for the same type of applications as XLCR 25 U, but has improved technical features:

- Virtually maintenance free
- Low friction
- No elongation
- High wear resistance
- Good chemical resistance
- Good temperature resistance
- Approved according to EC-regulations to be used as "material for food contact applications"

XLCR 25 H is also suitable for use with the wash-down conveyor system, Series C, and the stainless steel conveyor system, Series X.

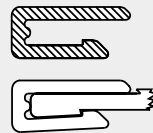

Mounting

XLCR 25 H is, from a mounting point of view, similar to XLCR 25 P, i.e. somewhat stiffer than XLCR 25 U.

Characteristics

Material	PA/PE (Polyamide/ Polyethylene)
Coefficient of friction	0,1-0,25
Temperature range	-40 °C to 100 °C
Colour	Grey
