

Type H slide rail for conveyor system XS

Slide rail X_CR 25 H is now available for all conveyor systems, including XS.

The type H slide rail is designed for the same type of applications as type U, but has improved technical features:

- Virtually maintenance free
- Low friction
- Moderate elongation
- High wear resistance
- Good chemical resistance
- Good temperature resistance
- Approved according to EC-regulations to be used as "material for food contact applications"

X_CR 25 H is also suitable for use with the wash-down conveyor system, Series C, and the stainless steel conveyor system, Series X.

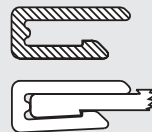

Mounting

X_CR 25 H is, from a mounting point of view, similar to X_CR 25 P, i.e. somewhat stiffer than X_CR 25 U.

Characteristics

Material _____	PA/PE (Polyamide/ Polyethylene)
Coefficient of friction _____	0,1–0,25
Temperature range _____	–40 °C to 100 °C
Colour _____	Grey

Ordering information

Slide rail
Length 25 m
PA/PE

XSCR 25 H
XLCR 25 H
XKCR 25 H

Please note that the package is slightly larger than for standard slide rail (the roll diameter is 750 mm).
