

ACCUMULATION TABLES

- ◆ **Balance Line Flow**
- ◆ **Provide Surge Protection**
- ◆ **Multiple Input Points**
- ◆ **Multiple Output Points**
- ◆ **Approximate First In-First Out**
- ◆ **Increase Line Efficiency**
- ◆ **Accumulate At:**
 - **97% Efficiency**
 - **Greater than 70% Density**
 - **Minimum Back Pressure**
- ◆ **Robust Design, Low Maintenance and Easy Access for Sanitation**

KEENLINE ACCUMULATION TABLES

All accumulators are offered in completely automatic, semi-automatic, and manual configuration.

◆ LINEAR (IN-LINE) ACCUMULATORS

- Recirculating type, mounts parallel to product flow
- For round shapes only

◆ BI-DIRECTIONAL TABLE ACCUMULATORS

- For round shapes only
- Used where floor space is available at right angles to product flow

◆ ALPINE ACCUMULATORS

- For round, oval, square, and rectangular shapes
- For light or heavy products
- Used where vertical space is available

◆ HELIFLEX BI-DIRECTIONAL ACCUMULATORS

- For round, oval, square, and rectangular shapes
- For light products and limited to 4" maximum height

◆ FIRST IN/FIRST OUT ACCUMULATORS

- For any product shape
- Operates parallel to product flow

◆ ROTARY TABLE ACCUMULATORS

- For round shapes only
- Limited to 60" diameter
- Can accumulate and single file
- Also used for uncasing (Dump Table)
